## NATIONAL WHIRLIGIG

By RAY TUCKER  
WASHINGTON (UPI)—The Democrats with a semblance of political power in the Senate, which is to say the Kennedy-Waterman faction would have a good chance of electing a majority in the Senate with a ticket of James A. Farley III, governor and Ralph J. Bunche for the United States Senate.

It would emphasize "solid" — the most spectacular and significant upset in an exciting off year. It could knock Gov. Nelson A. Rockefeller out of the gubernatorial race. I could bring an old

Ray Tucker, "Big Jim" back to the battlefield on which he excelled for many years.

It could send the first Negro to the United States Senate since reconstruction days. It could assure President Kennedy's reelection in 1964. These are possibilities which make the political game more interesting.

The two famous names were among others which Mayor Robert P. Wagner recently submitted to President Kennedy, who is desperately eager to remove Governor Rockefeller from the gubernatorial race. In the meantime, he has not ruled out the gubernatorial race, the two administration magicians must pull a candidate out of their top hats because time is running short.

THOUGHT OR UNKNOWN—It is so short that none of the other unknowns on the mayor's chart would have a shot of a chance to defeat Governor Rockefeller and Sen. Jacob K. Javits, a Gov. liberal. The others on his list are not known to be political power brokers in the metropolitan areas in the city or in upstate territory. They could not be built up into victors in a short campaign.

The nomination of any of them would be accepted as an admission of "expected defeat." In fact, the mayor's unwillingness to run against Governor Rockefeller has been interpreted by L. Judson Morrissey, Republican state chairman, as a "political suicide." He has been hailed as the Democratic strongest man.

A Party-Bunche ticket, linking a popular and nationally beloved Democrat and the Nobel prize-winning Negro and a United Nations official on the same ticket, would be a political and monetary windfall.

RADICALLY STRONG TICKET—Arthur Levitt, state attorney general, would help to fulfill another requirement also essential in New York and many other northern states—namely, the need for a strong and a radical ticket. Although he lost to the mayor in last year's primary, he was the only Democrat running statewide to survive the Rockefeller landslide a 57% majority, in 1958.

Rockefeller and Javits—like Farley and Bunche, are residents of New York City, the five boroughs would be the strategic and possibly decisive battleground.

Normally, the governor's heavy upstate majoritarianism would be that of the Democratic party, especially as he ran well there four years ago.

But a recent Democratic poll showed that, although his strength held up well in the East, he was not well liked in the Bronx.

With the racial appeal of a Party-Bunche-Levitt setup, and the probable addition of a man of Italian descent, it is believed that it would roll up an old-fashioned Democratic majority of at least 700,000 in the five boroughs.

It's just not realistic to talk about wilderness areas without consideration of location. What is considered wilderness in Idaho and most other parts of the West would be wilderness anywhere, but some of the East's versions of wilderness would evoke a smile from any westerner.

There's no need to make the West's wilderness areas "official" with the name. Any such designation would result merely in more government where less probably is indicated and in greater bureaucratic expense.

### CIVIL RIGHTS DEFEAT

Senate fails to shut off debate of a civil rights bill that would provide a federal civil rights commission which, it was felt, was not unexpected. Southern senators are in the process of blocking the bill to death because it would knock out so-called literacy tests which are an effective bar to Negro voting in the South. By failing to cut off the South's filibuster, the Senate left the field to the South. The bill was never given much chance of success.

There's another administration bill in the works on the civil rights issue. The other bill would abolish poll taxes which have been used to prevent Negroes from voting. Prospects for the second bill aren't too bright, either, but the civil rights proponents are difficult to push through Congress.

South was unable to indicate the solid Democratic-politics of the South, yet it could be used well to describe opposition to civil rights legislation.

Many politicians recognize the value of the Negro vote; not with a politician like Richard M. Nixon, admiring his underestimate of the importance of the Negro vote in the last presidential election. Mr. Nixon attributes his defeat to the fact that he didn't make enough effort to win the Negro vote. On the other hand, the civil rights efforts of the Kennedys both before and since the 1960 election could be interpreted as an acute awareness of the importance of the Negro vote.

Even in refusing to limit debate on the Harvey bill, senators indicated they did not wish to shut the door in the Negro's face. Along with their refusal to limit debate, they voted 64 to 33 against killing the measure. The net result is that 64 senators are on record as favoring the civil rights measure without actually voting for it, something that can be used in wooing the Negro vote. And yet senators from the South have been left free to talk the bill to death.

Even though both of the Kennedy administration's civil rights bills fail to pass, it will not be the end of the efforts along the line. The Negro vote helped elect President Kennedy, and more civil rights measures will be forthcoming.

Politicians aren't likely to forget there are plenty of Negroes outside the South who don't stay away from the polls.

### IEWS OF OTHERS

#### DIGGING MOTHER OCEAN

It is interesting to see the coast guard, after a late start, to break into the oceanography of the Arctic and sub-Arctic areas. Within a few days now, it will have planted buoys in Mid-Atlantic on lines three and four miles long. These lines will provide fixed points in the track of the ship as it makes its way north.

The oceanographic study is going ahead, the eastern Pacific as well as Alaska. And these are just in the first faint stirrings. A long-range program of expanding ocean science may be conveniently predicted, with enthusiastic support from the National Science Foundation.

This study is not limited to the coast guard. A long functioning program of ocean study in the navy is gaining impetus. Navy interest is in the Arctic and sub-Arctic areas, in the war, but also in their credit to the navy and other fields. This service has allowed the spirit of pure scientific enterprise almost as clear a sweep as a naval war.

To all of which we say Bravo! And pour on the coast. Old as the ocean is in the story of man, it is still a new frontier, almost as much as the moon. And long may its resources be used to draw new wealth from the rich storehouse of its dark and mysterious Mother Ocean—Navy Times.

#### COURTS PRO BAPTISTS

The U.S. supreme court's refusal to consider an appeal from a Rhode Island decision upholding the constitutionality of property tax exemptions to religious organizations implies that the high court does not consider such exemptions to violate the principle of separation of church and state.

Such exemptions are, in effect, benefits to religious organizations, which are granted to a religious organization, not to an organization.

Although the supreme court did not explain its reasoning, it is clear that the federal government is not in a position to interfere in the internal affairs of a church.

Both property tax exemptions and deductible gifts are essential to the church's financial health. Without them, the nation's economic commitment to religion would be much weaker, The Oregonian.

## How About the Girl Next Door?

## MARQUIS CHILDS WRITES ON WASHINGTON

WASHINGTON, May 11—In the war between business and government that periodically breaks out on the Washington scene, the department of justice is almost always in an exasperated position under a sniper's fire.

Today a considerable part of the business community seems to regard antitrust as an anachronism and of reprisal as a way to bring business to heel.

Nothing to it, I'm told. Marquis Childs continues his column on the administration's war on business.

KITTENS FOR KIDS DEPT. Dear Sir:

# Along Fences and Canals

Apparatus along ditch banks in Lincoln county was found during the frost of the past week, according to J. Howard Smith, county attorney. The apparatus was just right for picking but shorts are coming up. Also, lacking in some sections of the country are the blooms on flowering trees. This killing frost, however, probably came with the cold weather of the winter.

A number of farmers have asked about evidence of weevils in Lincoln county, and County Agent J. Howard Smith reports his inspection tour has been about the usual amount. Where the farmer has sprayed them each year there will be, but weevils are still present.

Mr. and Mrs. George Moody have a new quarter horse colt. This makes the third for them this spring. Also on the Moody farm, recently by Jack Eden, another colt has been added. Their 10 all from N. Marion, from Montana, Moody's have a yearling 1000 head consigned to the Shoshone sales yard on May 25.

Charles Ward has moved his cattle from Malta to his summer range in the Junction Valley area west of Almo.

Mr. and Mrs. Gene Walker, who live 1 1/2 miles northwest of Shoshone, and have recently completed a remodeling job on their home. They have added a bathroom and bath and utility area.

Harvey Maxson is one of several Filer farmers who had to replace their beef after the severe frost about 10 days ago.

Mr. and Mrs. Walter Matthiessen, Filer, were hosts to three field men from the Guernsey Cattle club. The men are consigning cattle for the Mt. Vernon Guernsey sale to be held this summer.

Mr. and Mrs. Floyd Jones, Buhl, have leased their farm in the Deep Creek area to the Jones Parlinas. The Joneses plan to leave Buhl the latter part of this month for a three-week trip to Washington, D.C., where they will visit their daughter, Cherry, who is employed by Rep. Ralph Hardin, D. Ida.

The Vern Johnsons, Buhl, have moved some 200 head of their cattle for summer range near the Salmon River between the two established ranches in the valley. They'll export their grain to up and down the valley as their sheep herds are out. The Johnsons also have a good stock of saddle horses available.

William Yoder, Filer farmer and cattlemen, has trucked his cattle to the Nevada range for summer feeding.

Mr. and Mrs. John Flemming, Elk Grove, Calif., have purchased the ranch formerly owned by Mr. and Mrs. J. E. Jacobs. Mr. and Mrs. Flemming, who also own a 1000-head ranch, have just completed a grade A pipe line milk parlor. The Paul Flemmings raise registered Jersey cattle. The men are brothers and each family has two children.

Mr. and Mrs. Clayton Peugh have purchased the ranch owned by Mr. Clarence Gage, 11 miles northwest of Shoshone. Oliver Gage, who has been living on the place, but will be moving when school is out. Del Glauner is farming the property this season.

Several farmers northwest of Shoshone, dehorned and castrated their cattle last week prior to putting them on the range. Among the men were Louis Kast, Ollis Williams, Harold Gooch, Merle Haas and Vaughn Higley.

Mr. and Mrs. Archie Jones, Shoshone, planted three-fourths acre of early red "spuds." These will then be for sale early in the spring, the planting to be on a farm they are renting near their own farm.

Harold Gooch, who lives 14 miles northwest of Shoshone, escaped injury when a tractor, John Deere A, he was using for setting a ditch for irrigation overturned. Minor damage resulted to the machine.

## Vaccination Is Requested for Swine to Curb Hog Cholera

WASHINGTON, May 11—The agricultural department has appealed to farmers to vaccinate their pigs against hog cholera this spring.

The department said the disease has more pigs affected than any other single disease.

A high level of vaccination is being urged in the "feed-the-feed" campaign now under way to eradicate this costly swine disease.

According to Dr. R. J. Anderson, director of the agricultural research service.

"It's particularly important," Anderson said, "that pigs in tratus be protected by vaccination because they have a greater chance of exposure to the disease."

Federal regulations proposed for the eradication program call for the vaccination of hogs in swine that are shipped across state lines.

Only about 45 percent of the hogs in the United States now are immunized against hog cholera, Anderson said.

"An infected hog, in effect, is a virus factory," Anderson said. Congress authorized the department last fall to establish a national hog cholera eradication program.

Anderson, who is a member of the National Board of Directors of the Feed Manufacturers Association, said W. T. Diamond, AFMA secretary.

The election which took place during the month of April, saw a record turnout for a second-term election, resulting for an initial three-year term.

Of the seven, five are newcomers and two have served on the board previously.

"Serving on the board for the first time will be Paul Batscheller, Zip Feed Mills, Sioux Falls, S.D.; William O. Cole, Cole Farm Supply, Cedar Rapids, Iowa; W. T. Diamond, AFMA secretary.

The election which took place during the month of April, saw a record turnout for a second-term election, resulting for an initial three-year term.

More than 5,000 outbreaks of hog cholera were reported last year in 48 states and Puerto Rico.

There is no cure for the disease, which affects hogs only, but available vaccines are effective and safe when properly used.

The department emphasized that spring is the peak season for vaccinating against cholera. Pigs should be vaccinated about two weeks after weaning. At this age, they are easily handled and will be protected before shipping.

Mill, Inc., Baltimore, and J. D. Stiles, Purina company, and W. T. Diamond, AFMA secretary, were reelected to a second term.

Those selected to serve a second term include: Claude J. Carter, Alabama Flour Mills, Decatur, Ala.; Robert H. Spitzer, Murphy Premium Cattle Company, Burlington, Wis.; E. L. Peery, and James M. Mestasola, Peery and Mestasola, Minn.; Ollis W. Johnson, Peery Peeks, Inc., Muscatine, Ia.; Elmer W. Lent, Allier Mills, Inc., Chicago, Ill.; and Robert H. Spitzer, Murphy Premium Cattle Company, Burlington, Wis.

Having served previously in the past decade, but not represented on the board, are: W. T. Diamond, AFMA secretary; E. L. Peery, and James M. Mestasola, Peery and Mestasola, Minn.; Ollis W. Johnson, Peery Peeks, Inc., Muscatine, Ia.; Elmer W. Lent, Allier Mills, Inc., Chicago, Ill.; and Robert H. Spitzer, Murphy Premium Cattle Company, Burlington, Wis.

## Heavy Alfalfa Loss Reported From Winter Kill in Blaine

BLAINE, May 11—About 40,000 acres of alfalfa have lost between 75 and 85 per cent of their alfalfa from winter kill, according to W. E. Smith, manager of the Irrigation Committee, a cultural stabilization and conservation office.

While a complete survey has not been made, some 7,000 acres are included in the 40,000.

The manager said, "The survey will be started on the 40,000 acres in the 'grave' of the '40 to '60 years. It is hoped that an adjustment can be made to the survey to encompass the older plants."

Per cent of the alfalfa on about 1,000 acres on about 15,000 acres in the 'grave' of the '40 to '60 years has been killed. On another 23 farms within the county, 25 per cent of the crop has been lost, according to a preliminary report.

Where the spots killed out are of substantial size, the farmers will reseed and attempt to obtain a small cutting this fall. In that case, the yield will be less than the normal 2,000 bushels per acre.

The bright spot in the situation is the fact that an abundance of water will be available during the irrigating season this year.

**BIG HOLE BELOW** Magic dam is impounded as a full head of irrigation water is released for farmers served by the Big Wood River Canal company. The spillway of the dam (1) is overviewed by ...

...ing for the first time in four years as the reservoir is completely full. A spillway falls (2) is seen leaping the canyon wall to the Wood River below. (Times-News photo)

**SPILLWAY OF DAM** feels water for first time in years as Magic reservoir overflows. Wallen, superintendent, observes the welcome situation which results in free water for downstream farmers. He expects the overflow to increase and continue well into June. (Times-News photo)

## Magic Dam Spills for First Time in Four Years; Water Allotment Assured

**SHORELINE, May 11** — Magic reservoir is full and water is over the dam gates for the first time in years.

Will Wallen, superintendent, said that in his opinion the spill will not be a problem through June. This is the first initial overflow in four years, he said, and the last time water got high enough to spill was just rarely made it.

The reservoir contains 190,000

acres feet of water.

Water through the needles under the dam is now running full but the water is not yet at the dam.

Farmers getting irrigation water from the reservoir will get their full allotment this year, plus a

**Salt Can Aid**  
In Defeating  
Grass Tetany

**SAN FRANCISCO, May 11** — Grass tetany, an always serious and sometimes fatal disease of milking cattle and ewes, can be controlled and eliminated by a simple expedient of feeding extra amounts of salt.

Symptoms of grass tetany, according to Dr. W. W. Weller, technical director, Leslie Salt company, include nervousness, lack of appetite, rapid breathing, convulsions, and death if not checked, death. The disease is related to a magnesium deficiency but the cause is not definitely known. It is believed that magnesium or magnesium-calcium-potassium-sodium is the nutrient in the rumen.

"The disease is of concern now," he said, "because it occurs chiefly among milking cows and lactating ewes after they have been turned out to spring pasture."

"However, adding sodium to feed, pastures stimulates milk production and the animal suddenly drains the animal's magnesium reserves. But just adding more magnesium directly to the feed, instead of fertilizing the pasture does not provide the whole answer."

"However, adding sodium as feed, salt does not help a sheep, according to reports of a two-year study, just released."

Weller said that it is "lucky coincidence" that it is easier to eat more salt when on early spring ranges than it is at other times of the year. "It just happens to be the time when we are trying to protect them

...since where possible from mineral deficiencies."

## Washington Will Host Engineers

**WASHINGTON, May 11** — Some 800 engineers and their families are expected to Washington, D. C., next week for the annual summer meeting of the American Society of Agricultural Engineers. They will hear about the latest developments in engineering, applying fertilizers and pesticides to rural zoning.

The meeting opens June 17 and runs through June 20 at the Mayflower hotel.

More than 150 technical papers will be presented by speakers from industry, federal and state government, and educational, commercial firms, and 27 land-grant colleges. Papers outlining agricultural engineering research in West Germany, Israel, Italy, Canada, Australia, and India will also be heard.

Some of the reports include development of windowless poultry houses, self-cleaning hoppers, methods of handling and treating and removing radioactive residues from milk. Some of the engineering problems discussed will be in crop, root, seeds in farming man to space will also be presented.

Two of the featured speakers for the concluding sessions on June 20 are Dr. Delwin S. Branson, president of the American Society of Agricultural Engineers, and Dr. Geoffrey Keller, a assistant director for mathematics, physics, and engineering sciences, National Science Foundation.

Secretary of Agriculture Orville Freeman will speak at a special program at the University of Maryland in nearby College Park. The program is a joint observance of the U. S. department of agriculture and land-grant college centennial sponsored by the Maryland chapter of the American Dairy Science Association in cooperation with the University of Maryland.

To Jack Brown of Broadfoot he delivered 23 black Scotch pine, 20 Engelmann spruce and 25 Douglas fir.

Richard Dick received 25 Scotch pine, 50 Engelmann spruce and 25 Douglas fir, L. N. Nease, 25 Douglas fir, 25 Alpine olive, 25 Siberian pea, 25 Siberian elm, 25 hybrid poplar. These will be used as windbreaks.

G. G. and G. G. Cook, Carey, received 300 Siberian pea and 100 juniper. They will enlarge their windbreaks, which they started in 1960, adding some trees last year.

Millard Means, Carey, received 100 Siberian pea, 100 golden willow and 100 Norway spruce.

The Mainline ranch in the Minidoka area received 100 Siberian pea, 100 green ash, 100 honey locust, 100 golden willow, 100 Scotch pine, 50 Norway spruce and 50 Engelmann spruce.

## Africa Takes

### Step to Plot Market Plans

WASHINGTON, May 11 (AP)—Several African countries recently took a look at the European common market and apparently saw what they saw: they have taken steps to establish their own common market.

Representatives of Algeria, Morocco, Guinea, Rhodesia, Malaya, and the Philippines met in Casablanca, and adopted these general plans. Member states agree to establishment of a customs union; coordination of economic affairs; customs union; and legislative cooperation in each of them; adoption of a common policy in relation to basic products; and the unification of customs classification methods.

Each member state within five years from date of agreement agreed to adopt a tariff on imports from non-member countries through progressive reductions.

A permanent body called the African Economic Council shall be set up to supervise implementation of the agreement.

Market is to be open to all African states and to be based on free exchange of goods and products.

## Potato Yield

### Increases as

### Acreage Falls

UNIVERSITY OF IDAHO, Moscow, Wash.—U.S. potato production has been steadily concentrated on specialized potato farms and in specialized production areas between 1920 and 1950, according to a study taken from "A Survey of the U.S. Potato Industry" published in a recent issue of "Economic Research Service" of the U.S. Department of Agriculture.

During this period, 1920-1950, acreage harvested declined 88 per cent, but yield per acre nearly tripled and production increased about 100 per cent.

Potato production in the early areas more than tripled during the period, increasing from 15 million to 42 million cwt. Production in the late areas increased from the same amount, from 18 million to 216 cwt.

Production in the intermediate areas increased, but production dropped from 28 million to 18 million cwt.

Shifts between regions have been more pronounced than shifts within regions, particularly in the late areas.

Cross said that root knot nematode and fusarium smut are the two most important diseases in the late crop states. The central area declined sharply, but the importance of the central region increased sharply in the late areas.

Rapid expansion in the west raised its share to 45 per cent from 20 per cent of the total production.

While the western area, Idaho increased its production nearly seven times, the 1920-40 average production was 2.2 million cwt. During those years, Idaho was more than half the total western area production, but in 1950, it was less than 20 per cent of total western production.

Production in Oregon, California, Colorado, and Washington

increased to 4.5 million cwt.

During those years, Idaho was more than half the total western area production, but in 1950, it was less than 20 per cent of total western production.

Production in Oregon, California, Colorado, and Washington

increased to 4.5 million cwt.

Maine was the only state in the eastern region to show an increase in total production, while all other states in the region produced less than 10 per cent of the total production.

Far reaching changes took place in the eastern region. The central area, which had been the center of production was accompanied by longer transportation hauls. Additional services were required to meet the increased transportation costs and caused the average marketing cost for a 10 pound bag of potatoes to double between 1920 and 1950.

Increase in price associated with processing has helped the demand for potatoes. Consumption of frozen potato products increased from 1.1 million pounds in 1950 to 487 million pounds in 1960.

Corn Sheller Features New

### Quick Change Harvest Unit

COLDWATER, O., May 11—A fully mounted field sheller, interchangeable in less than 15 minutes, has been developed and is being developed. It is now available for New Ideas equipment company's mounted planter or planter.

The sheller features a large type shelling mechanism, to give high capacity in a wide variety of field conditions, with more than 4000 bushels per hour. The unit's extra long wagon auger has an exclusive "corn sheller" which provides efficient load leveling that can be controlled from the tractor seat.

The sheller catches product feed, starting and wagon loading augers. The unit has only three daily lubrication points. Jacks, parking stands and a safety chain, ladder, are standard equipment.

EDWARDSON APPOINTED  
CHICAGO, May 11—Edwardson E. Erickson has been appointed sales representative for American Potash and Chemical company's western regional office at Chicago. According to John L. Anderson, regional sales manager,

the new man will be responsible for the sale of potassium chloride.

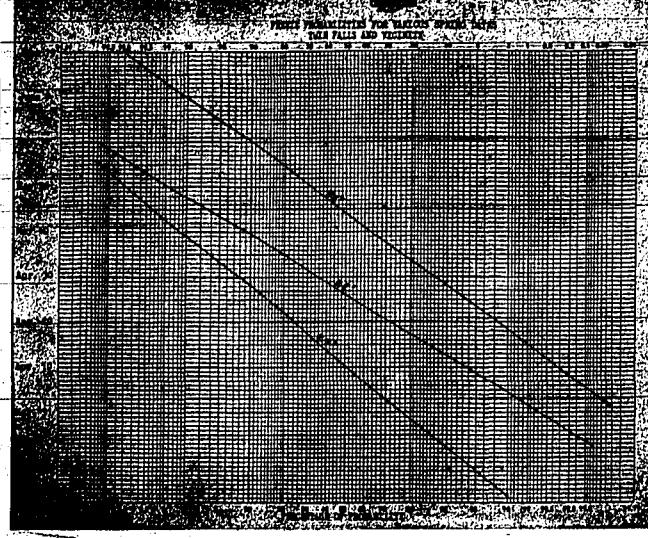

Foreign material is removed by a shaker screen and high capacity fan blower. A separating auger

## Additional Moisture Could Alter Range Grass Picture

SHOSHONE, May 11—The grasses are those that raised the range in the intermediate grassland areas with grass on the higher elevations reflects the moisture situation than in prior years.

According to Marvin Pearson, Bureau of Land Management, the grass is pretty much the same throughout the Shoshone and Burey districts. Prospects of an exceptional year will depend on the weather that falls in the next few weeks.

Ample moisture has already had a good effect on the grass. It is coming up and much thicker and taller than a year ago. Annual

If the abundant grass dries out, it could create a total moisture situation in the late summer months. Abundant tall dry grass would be a favorable one for a fire.

Supervisory personnel are now working on the range to add to the firebreaks which will be added about the first of June.

Cattlemen and sheepmen who are raising projects carried out by the BLM are now monitoring the quantity and quality of the range under their management. A long range program is a slow conversion from a grassy range to a more grassy range.

Ample moisture has already had a good effect on the grass. It is coming up and much thicker and taller than a year ago. Annual

### Ag Enrollments Drop Each Year

WASHINGTON, May 11—Among college enrollments in the U.S. today, agricultural colleges can claim only 15 per cent of the students, and not enough to fill one-third of the potential jobs open in the agricultural phase of research, business, industry, communications, education, conservation, and services according to educational authorities.

In 1947, says the Stamford Research Institute, nearly 400,000 students were enrolled in land grant colleges. Of these about 45,000 or one-third were taking agricultural courses. Later enrollment was up to 415,000; but agricultural students had dropped to 200,000.

Total agricultural degrees in 1958 were 15,250, or half the figure eight years ago.

## T.F. War Moms Plan Carnation Sale for May 12

Two full chapters of American War mothers will hold its annual carnation sale Saturday. Members will sell carnations. All proceeds will be used for veterans welfare work. Funds will help purchase equipment for VA hospitals, medical supplies, materials, subscriptions, books, magazine, and entertainment for hospitals.

Money also is needed for transportation to and from hospital for food, clothing, bedding, medical supplies, activities and cards and flowers for the sick.

The Twin Falls chapter donates to the welfare fund and Mountain Home air force base in addition to the Boise VA hospital.

Community service donations include those to the Red Cross, Red fund, Marine Corps, Diners Club, and the Idaho YWCA, and the Idaho YWCA Ranch. These donations are made through card parties, food sales and white elephant auctions.

## God's Family Is Theme for May Fellowship Day

"ALL NATIONS SHALL CALL ME BLESSED" will be the theme of the annual Marian luncheon for St. Edward's Council of Catholic Women at 1 p.m. at the Turf Club. Holding two dolls representing foreign countries is Mrs. William Malberg, right. Looking on are, left, Mrs. R. L. Kreilkamp and Mrs. Donald

John Squires, president of United Church Women, was master of ceremonies.

Over 75 women attended. Mrs. Ethel Martin, chairman, and Mrs. Alice H. Casperon, Mrs. Barbara Martin, led a litany, reading.

A choral reading was presented by Mrs. T. M. Robertson. Participating in the reading were six Open Eye Roach, Mrs. James Parker, Mrs. Jean Vandervort, Mrs. Gladys Gandy, Mrs. Alice Elliott, Mrs. Norman Coker, and Mrs. Easel Hicer.

Speaker was Mrs. E. M. Wright, her subject was "Am I My Brother's Keeper?"

A special program was held for late rate relationships. The Rev. Earl Hicer gave the benediction.

A change of the nursery was made by Mrs. Russell and Mrs. Lois Weinman.

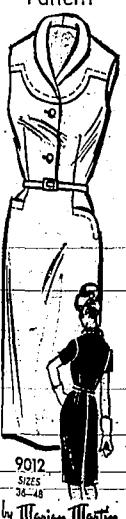

The annual clothing drive of United Church Women was culminated with the arrival of a large truck and capacity load of clothing from America. Over 2,000 pounds of dressed clothing and blankets were collected from Magic Valley. The clothing will be sent to missionaries in both America and Asia. Chairman for the fellowship day and the drive was Mrs. Reid Barton.

## Food for Americans By GAYNOR MADDOX

### CHEDDAR CHEESE BALL
